Skin Candy Sugaring

Sugaring is a gentle, effective, and hygienic hair removal method that simultaneously exfoliates the skin, leaving it silky smooth.

Finnish brand Scandinavian Skin Candy is a professional hair removal brand developed for professionals. Its patented Xylitol-containing pastes have also been granted the Key Flag Symbol. Skin Candy naturally and safely removes hair from all skin areas. Xylitol makes hair removal efficient, moisturizes the skin, and maintains hygiene. Natural ingredients do not cause allergies or irritate the skin.

Sugar, especially Skin Candy containing xylitol, helps prevent inflammations and speeds up skin healing after treatment. Because the pastes are made from natural ingredients without any additives, they can even be used by clients with allergies, psoriasis, or dry eczema. Through a series of treatments, sugaring restrains hair growth and changes the hair's texture to become softer. It's advisable to avoid shaving just before sugaring, as hair removal is more effective when the hair is slightly longer, and this also prevents unnecessary skin irritation from shaving.
